

Golang静态检查

主要使用golangci包

安装并运行

```
1 go get -u github.com/golangci/golangci-lint
2
3 pushd ${GOPATH}/pkg/mod/github.com/golangci/golangci-lint@v1.41.1/cmd/golangci-lint
4 go build
5 cp golangci-lint /usr/bin
6 popd
7
8 #运行
9 golangci-lint run
```

整体代码的检查

code_check.sh

```
1 #!/usr/bin/env bash
2
3 function Fail() {
4     echo "Abort with FAILs."
5     exit 1
6 }
7
8 echo -e "Process go vet...\c"
9 go vet $(go list ./... | grep -v /vendor/) || Fail
10 echo "PASS"
11
12 echo -e "Process ci-lint...\c"
13 which golangci-lint 1>/dev/null || (echo "Installing golangci-lint" && go install
    github.com/golangci/golangci-lint/cmd/golangci-lint@v1.32.2)
14 golangci-lint run --timeout 10m || Fail
15 echo "PASS"
16
17 echo -e "Process go test...\c"
18 go test $(go list ./... | grep -v /vendor/) -timeout=10s || Fail
```

```
19 echo "PASS"
```

```
20
```

```
21 echo "All check passed."
```
